Dear Sir/Madam,

I've viewed the website of your studio and am impressed by your reels. I have large interest in storytelling and always dream about one day I can work as visual development designer in a great creative team as yours.

I just graduated from computer art department of School of Visual Arts this May. My specialty is visual development design. In my applied arts education, I have created works in the mediums of illustration, 2D and 3D animation and was responsible for character design, storyboarding and concept art in some animation projects. In addition, my experience in working as freelancer has allowed me to develop the skills with managing the project schedule as well as being a problem-solving oriented designer. I am excited to work with talented people and learn from them on challenging projects. It brings me great satisfaction to be a part of the process that sees a project from concept to completion.

I would appreciate the opportunity to meet you to discuss my qualifications in greater detail. I can be reached at 718-986-6811 or classmateg5@gmail.com. Thank you for your consideration.

Sincerely,

Shih-Heng, Huang
